DETAILED ACTION

Remarks

This Office action is responsive to applicant's amendment filed August 13, 2004.

Claims 1-5 are pending.

Claim Rejections - 35 USC § 103

The rejection of claims 1-5 under 35 U.S.C. 103(a) based on Kita et al. in view of the Merck Chemical Database has been withdrawn.

Kita et al. teaches a volume percent of 11.5 for FB which is below applicant's volume percent endpoint of 12.5. The examiner concedes that Kita et al. teach away from a higher amount of FB in that beyond 10 part by weight (corresponding to 11.5 by volume) Kita et al. teaches a resulting deterioration of electrolytic performance.

Additionally, upon further consideration of Kita et al., the examiner notes that the fluorine content is disclosed to adsorb or react on the surface of a carbon material. (par. [0015]) Thus, the volume percent of FB is reasonably concluded to actually become *lower* than 11.5 volume percent as the fluorine content precipitates or reacts out of solution.

For these reasons and in view of applicant's assertion of unexpected results shown in Tables 1-3 of the present application, Kita et al. has been withdrawn as a basis for rejection of claims 1-5 insofar as not teaching or suggesting at least to the skilled artisan a non-aqueous electrolyte composition having the claimed 12.5 to 50 volume percent.

Allowable Subject Matter

For the reasons set forth above, claims 1-5 are allowed.
